Citizenship: USA

Fields

Research: Energy and Environmental Economics, Public Economics, Industrial Economics
Teaching: Energy and Environmental Economics, Public Economics, Industrial Economics

Education

Ph.D., Economics, Northwestern University, 2026 (Anticipated)
Committee: Mar Reguant (Chair), Piotr Dworczak, Chris Udry, Silvia Vannutelli
M.A., Economics, University of Chicago, 2019
B.A., Environmental Analysis, *cum laude*, Pomona College, 2016

Fellowships & Awards

Vising Scholar, Federal Reserve Bank of Chicago, Microeconomic and Regional Teams, 2024
University Fellowship, Northwestern University, 2022-2023
National Science Foundation Graduate Research Fellowship, 2018

Teaching Experience

Teaching Assistant, Northwestern University, 2025
MMSS Senior Seminar (Gastón Illanes)
Curriculum Development, University of Chicago, 2016-2017
Global Energy and Climate Challenge (Michael Greenstone and John Deutch)

Research Experience

Research Specialist, Climate Impact Lab, 2018-2019
Research Assistant, Michael Greenstone, Energy Policy Institute of the University of Chicago, 2016-2018
Summer Research Intern, Yusuke Kuwayama, Resources for the Future, 2015

Conferences

Group for Research in APplied Economics (GRAPE) Inequality-aware Market Design (IMD) Seminar, 2024

Refereeing

“Redistribution with Limited Information: Fuel Subsidies and Cash Transfers in Indonesia” with Budy Resosudarmo

In-kind transfers may outperform cash as a means of progressive redistribution when information is limited – when a government has limited data with which to identify poor households. Recent work in mechanism design formalizes this problem, and we take these models to data to examine the grounds for one of the most common types of in-kind transfers worldwide: energy subsidies. In our model, a planner with progressive redistributive goals and limited information chooses between cash transfers and nonlinear fuel subsidies. The optimality of an in-kind mechanism over a targeted cash transfer is determined by the joint distribution of household income, observable characteristics, and household fuel demand. We estimate the primitives of this model for the Indonesian population using rich administrative survey data and variation generated by large fuel policy reforms. We quantify

optimal interventions among nonlinear fuel prices, targeted cash transfers, and combinations of the two. Targeted cash transfers outperform optimal fuel subsidies in most cases.

Works in progress **“The Effects and Effectiveness of Emergency Price Controls during Natural Disasters”** with Michael Dinerstein, Nadia Lucas, Ishan Nath

“Paid Maternity Leave and Childrens’ Outcomes in the Long Run” with Tessa Bonomo

Approved US Census Bureau Project

The US is one of few countries worldwide without a national mandate for paid maternity leave, and as such, we know little about the effects of paid leave in this context. The first cases of statewide maternity leave in the U.S. came about somewhat unintentionally through changes in state Temporary Disability Insurance (TDI) in the 1960s and 1970s. Six to seven decades later, we have the opportunity to explore the long run effects of access to paid maternity leave on children, later in their lives. We do so employing a differences-in-discontinuities design around changes in state TDI policies which made disability insurance available for pregnancy. In “first stage” results, we provide new estimates of the effects of paid maternity leave availability on infant birth weights, improving upon existing methodologies estimating the same effect in the literature, and finding much larger positive effects. In a “second stage” exercise, we will link measures of the education and earnings of children with their birthdate records using Census and Numident data to provide the first estimates of the long run impacts of paid maternity leave on children for the US.

“Income Downscaling with Nightlights” with Tamma Carleton, James Rising

Working papers **“Does the Value of Reliability Capitalize in Water Markets”** with Yusuke Kuwayama, Tyler Treacle

Published papers **“Private Markets and Public Assistance for Natural Disaster Supplies”** with Michael Dinerstein, Nadia Lucas, Ishan Nath, *AEA Papers and Proceedings*, 2025

Languages English (fluent), Spanish (limited working proficiency)
